

Explorations of the Rubik's Cube

A Sophomore Seminar taught by Kensen Shi (S303)

Thursdays, 8:00 – 9:00 PM

*For some reason, this image
really bothers me...*

*Ahh, much better! Look at those
gorgeous symmetries!*

Everyone knows about the Rubik's Cube. Will you become one of the few who can solve it?

- No prior experience required, cubes provided
- Learn a basic layer-by-layer approach with several advanced optimizations
- Explore cube mathematics, other solving methods, and other twisty puzzles (if time permits)
